DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 recites the limitation "the metallic reflective layer" in lines 2-3. There is insufficient antecedent basis for this limitation in the claim.

Claim 4 recites the limitation "the phase change layer" in lines 2-3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by SU 5,540,966 or US 6,007,889.

Both references disclose a ROM recording medium comprising two recording stacks where the recording stack farthest from the incident side comprises less than three adjacent inorganic layers. See '966 Figure 1 and '889 Figure 3.

Claims 1, 6, 8 are rejected under 35 U.S.C. 102(b) as being anticipated by US 6,030,677 or US 6,117,284 or US 6,177,168.

All three references disclose a ROM recording medium comprising two/four recording stacks where the recording stack farthest from the incident side comprises less than three adjacent inorganic layers. See '677 Figure 2, '284 Figure 4, '168 Figure 5.

Allowable Subject Matter

Claims 2, 5, 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
